Dear Sir,

**REGARDING EXPERIENCING POWER FLUCTUATION**

I experience sudden power fluctuation when the neighbour S.Wahida resides 223J, Bungalow Road, Manamboda, Ukuwela., is using an industrial type of grinder.

I have already three times got burnt my setup box of TV and recently I'm getting many motherboard issues in my laptop which I got repaired. For these repair, I spend more than 6000 LKR. Very recently only I could realize or identify the reason.

I do conduct private group lectures at home for Civil Engineering professionals. Here they are using their laptops and other low power electronics also from my side I use 43" Smart TV and low power devices. I don't want to get damage the electronics in future.

I hope the solution and immediate action from CEB Matale, as I always receiving the satisfied service.

Thank you

With Regards
